

# Garlock Expansion Joint ABRA-LINE™ Style 404EPS

Engineered for Abrasive Applications

The ABRA-LINE™ family of products was developed for highly abrasive applications typically found in the power generation, fertilizer, mining and chemical industries. These may include flue gas desulphurization systems, phosphate mining, dry bulk power transfer systems, tailings and slurry applications. Our proprietary urethane formula was designed to reduce wear and extend service life.

Style 404EPS (Extreme Pressure Service) is a fully customizable abrupt arched expansion joint for rigid piping systems. This expansion joint is to be used in applications where necessary rated pressures exceed those of the Garlock Style 404 & 404HP designs. Style 404 can be constructed as a single or multiple arch design. It can also connect pipe flanges in concentric or eccentric tapers, to join piping of unequal diameters.

## DESIGN

- » Tube
  - Proprietary urethane formula for abrasive applications
- » Body
  - Composite fabric construction with welded, treated metal body rings for dimensional stability
- » Cover
  - Wide selection of elastomers available which are resistant to oxidation

## OPTIONAL CONFIGURATIONS

- » Multiple Arch- For higher movements
- » Filled Arch- To eliminate media buildup
- » Oversized Arch- For higher movements
- » Concentric and Eccentric Tapers- To connect piping of unequal diameter
- » Custom Drilling- ANSI, DIN, AWWA, BS, JIS, and special drilling patterns available on request
- » Extended Face-to-face
- » Offsets, lateral, angular, and torsional

## TARGET MARKETS

- » Power Generation
- » Fertilizer
- » Mining

## RETAINING RINGS

- » Required for all applications; provides metal surface to distribute bolt load evenly, preventing flange damage during bolt tightening
- » Standard material: mild steel with corrosion-resistant coating; galvanized or stainless steel also available

## CONTROL UNITS/TIE RODS

- » Recommended on most applications to prevent damage due to excessive pipe movements
- » Standard material: mild steel, galvanized or stainless steel also available

**SPECIAL COVER MATERIALS**

- » CSM                               » EPDM
- » Nitrile                           » Neoprene
- » Natural Rubber               » FDA materials available
- » Fluoroelastomer           » Chlorobutyl

**TEMPERATURE**

- » Standard Chlorobutyl/Polyester

+180°F (82°C)
