Minneapolis, MN – April 1, 2021 - VSP Technologies announces today that Kevin Larkin, Owner and President of Power Dynamics, Inc. is moving on to a well-deserved retirement. Kevin sold the company to VSP Technologies in December 2020 and has remained on to successfully see the company through its transition period.

Kevin started his career with Garlock Sealing Technologies working in both inside and outside sales. After 15 years of success and receiving numerous awards, Kevin became a member of Garlock's elite Salesmaster Club. In 1997, Kevin joined Power Dynamics as General Manager and Vice President before purchasing the company.

Since purchasing Power Dynamics, Kevin increased sales by over 200% in the first 8 years. Kevin was a hands-on manager and realized the company's success was dependent upon their customer's satisfaction, therefore making every effort to over deliver and exceed customer expectations.

PDI is a leading supplier of fluid sealing products and services including mechanical seals, expansion joints, braided packing, and metallic/non-metallic gasket materials. In addition, PDI now has access to VSP's Engineered Product Line and Engineering Services and will continue operating under VSP's leadership.

Please join us in wishing Kevin a wonderful retirement.

#### **About Power Dynamics**
